

# SanificaAria 30

sanitization

**BUILT-IN CONTROL**

**ROOM UP TO 50m<sup>2</sup>**

The SanificaAria 30 is a compact solution that safely filters and sanitizes the air via a variable speed axial fan intake that draws air into the closed chamber containing the UV-C source. This chamber is where the process of sanitization is carried out. The UV-C cartridge with UvOxy technology is installed inside the unit and has an average service life of 12\* months. Cartridge replacement is easy and ensures the purification properties of the SanificaAria 30 over time. Flexible mounting options including wall, slab or floor stand allow for versatile installation. Control of the unit is by an integrated button.

## Applications

Hospitals, hotels, schools, offices, restaurants, shops, bars, houses, etc.

## Tests and certifications

Tests carried out according to ISO15714 standard on different strains of bacteria, viruses and other microorganisms.

The device also complies with the safety requirements laid down in IEC60335-2-65 standard on air purifiers

## Specifications

**Power supply unit** 120-277V

with 2m long cable

**Consumption** 25 W

**UV-C Wavelength** 254nm

**Purification rate** 30 m<sup>3</sup>/h

**UV-C power** 18 W

**UV-C radiation power** 5,5 W

**Recommended service life of the Cartridge\*** 12 months

\* Service life calculated for on average daily usage of 24h

## INTELLIGENT AIR SANITIZING

UvOxy® technology, which draws contaminated air in and provides sanitized air, is standard on all Boghelli SanificaAria products. The SanificaAria 30 features a UV-C chamber that has been sized to purify a high volume of air. Ideally suited for medium to large rooms, the SanificaAria 200 features 3-speed variable axial fans; making it possible to treat up to 30 m<sup>3</sup> of air per hour.
