REMOTE SANITISATION MANAGEMENT, VIA SD LOGICA FM CONTROL UNIT, OR LOCALLY, WITH THE DEDICATED APP

With the integration of the SD Logica Control Unit, the sanitisation system can be connected to a network. The main parameters to regulate the system are the 3 levels of fan speed and the operating time. The system can be accessed from the NuBe portal to adjust all parameters, even remotely.

The Sanifica Aria Beghelli BLE APP (Bluetooth local remote control) has been designed to locally control the sanitisation system built into the luminaire, with the utmost simplicity. Using Bluetooth technology, the smartphone becomes a real remote control for the system, adjusting fan speed and setting the operating times of the air sanitizer.

The lighting system must consider both the required level of lighting obtained from the lighting calculation and the power saving needs. LED Panel RTI SanificaAria allows you to achieve this result thanks to its driver with a 3-step current modulation switch that provides maximum luminous efficiency and, therefore, maximum power savings, while observing the luminous flux set out in the design phase.

 **HCL-CCT module, both in SD and RD version, for automatic colour temperature variation according to the solar time or to set 2700, 4000, 6000K constants**

The HCL-CCT module equips both RD and SD series luminaires and allows a colour temperature adjustment in 3 steps 2700K - 4000K - 6000K (CCT). It also enables the automatic HCL (Human Centric Lighting - Biodynamic Lighting) mode, which adapts to the human biological cycle. To simply perform this function, a new preconfigured system has been developed, which takes care of the dynamic synchronisation of colour variation corresponding to the time of day with the human biological clock (circadian cycle). Each luminaire has a pre-set clock to synchronise the automatic cycle with the time of day as soon as the luminaire is connected: simply set the selector switch to HCL mode, the luminaire will recognise the time of day and provide the most suitable colour temperature. With the same selector, you can set the luminaire on the HCL or CCT mode (2700K - 4000K - 6000K) and, in the SD Auto-dimmer version, the light output also takes into account the natural light input in the room.
